 Computer Technology Certification
 Introduction to Automotive and Transportation
 Partnership with The College of Technology for Transportation

Vision

All graduates will be college and career-ready as we provide a meaningful pathway to lifelong learning for every student. By fostering the boldness to dream and by developing a commitment to inner growth and outward transformation, our graduates will be ready to design their own futures.

Mission

The mission of EPIC High Schools is to challenge all students to dream big and to support them in designing their future. We recognize that each student is an individual and therefore provide a series of learning experiences that equip young people to walk their unique paths. We honor and integrate the cultures of our communities to make learning relevant, responsive, and accessible, as we develop citizens with a positive sense of self, ready to stand for social justice.
